

TESTIMONIAL FROM OHIO STATE UNIVERSITY

“When I first got a look at the Professional Floorcovering publications I was amazed at how much information each book contained. I saw right away the value these books would bring to the students in my Construction Management program at Ohio State ATI. These books guide the reader through understanding the various floorcovering materials better and having the necessary knowledge to work with a customer and advise them about selecting materials for their projects. For my purposes, the most valuable feature for my students is the explanation and examples that are provided to assist with learning to estimate the project. The author put together great examples with extensive information to assist the sales associate or student with learning the process completely. The books are extremely well written, there are fantastic photos to accompany the material descriptions, and the estimating tips and project examples will be very helpful in my classes going forward.”
